Usability Testing

Apply for a badger licence (A24)

- Work Activity Details
- Permissions to Start Work
- Conservation Considerations

Hina Patel

June 2023

Methodology

- 5 ecologists attended 1-to-1 usability testing sessions remotely.
- 4 male, 1 female
- Each session:
 - Ran for 60 - 75 mins
 - Started with a short background interview
 - Presented the prototype of the service and observed and listened whilst participants used the service
 - Carried out 3 task based activities to set context for 3 flows we wanted to test:
 1. Give work activity details
 2. Permissions to start work
 3. Conservation Considerations

Research Questions

- Do any of the questions/steps in the user flows **confuse people**?
- How **easy is it to fill out the form** and provide the information requested?
- Are there any problems with **navigating** through the flows?
- Are there any **options or information missing**?
- Does the **terminology** used make sense (hybrid, activity, next to)?

Who We Spoke To

No	Gender	Role/Experience	Digital/access needs
1	Male	Experience in applying for wildlife licences. Mainly deer. Retired.	
2	Male	Owns ecological consultancy. Applying for A24 licences since 2006. 22 years experience as an ecologist	
3	Female	Principal ecologist. 10 years experience. Not applied for A24 in last year.	
4	Male	Owns ecological consultancy. 16 years as an ecologist. Applied for A24 in last year.	Dyslexia
5	Male	Self employed ecologist. 33 years experience as an ecologist. Applied for A24 in last year.	<ul style="list-style-type: none"> Digital Inclusion Scale(1-9). Score = 5. <i>Learning the ropes</i> May need help when they use digital services as they develop digital skills.

Digital inclusion scale

Work Activity Details

Scenario: I'd like you to imagine that you're working on a project for an individual householder. The work involves maintaining the structural integrity of a barn. There are badger setts that extend close to the barn.

OGL All content is available under the [Open Government Licence v3.0](#), except where otherwise stated

What activity or development work do you plan to do?

- Generally well understood.
- Users felt the wording for this question was intended for the client (developers), rather than ecologists
 - *“I'm planning to mitigate any impacts to the badgers. It's not me that's planning the development work - it's the client” P2*
- Some provided a brief response, while others were more detailed and accurate
 - *“To make sure it's as accurate as possible against what they're doing, I would copy and paste that in and maybe tweak it for readability...So person reading can see where the potential risk is and where we might disturb or impact badgers” P3*
 - *“Normally we keep this very, very brief because the planning permission and method statement we attach contains all the detail” P4*

The screenshot shows a GOV.UK prototype interface. At the top, the header includes the GOV.UK logo, the title 'Apply for a licence to do work that affects a protected species', and a 'Sign out' link. Below the header, a blue bar indicates 'PROTOTYPE' and provides feedback information. The main heading is 'What activity or development work do you plan to do?'. Below this, an example text is provided: 'For example, construction of a new road, maintenance of a bridge, construction of five flats with access road and car parking area.' A large text input field is present, followed by a green 'Continue' button. The footer contains the GOV.UK Prototype Kit version (v11.0.0), a 'Clear data' link, the Open Government Licence (OGL) v3.0 statement, and the Crown copyright logo.

Exemptions from paying for a wildlife licence

- Users understood this page lists the conditions for licence fee exemptions.
- The page was considered a helpful reminder of exemptions but...
- Perceived to be too wordy
 - *“I would say it wants to be condensed” – P1*
- Vague, generalised information caused confusion
 - Some items in the list apply to other licence types
 - No mention of A24

The screenshot shows the GOV.UK website interface for applying for a wildlife licence. The header includes the GOV.UK logo, the title 'Apply for a licence to do work that affects a protected species', and a 'Sign out' link. Below the header, a 'PROTOTYPE' banner states: 'This is a new service – your feedback will help us to improve it.' Navigation links for '< Back' and 'Save and return later' are present. The main heading is 'Exemptions from paying for a wildlife licence'. The text reads: 'You may not need to pay for a wildlife licence if your project will:' followed by a bulleted list of exemptions: 'preserve public health and safety', 'prevent damage to livestock, crops, timber or property', 'prevent disease spreading', 'be home improvement through householder planning permission or permitted development', 'be for scientific, research or educational purposes', 'be for conservation of protected species, including protection of bat roosts', and 'be to conserve scheduled monuments, listed buildings, places of worship, or traditional farm buildings'. Below this is the question 'Do you think the purpose of your project is exempt from payment?' with radio button options for 'Yes' and 'No'. A green 'Continue' button is at the bottom of the form.

“It's not very specific, it just says wildlife licence...and these exemptions may apply to other licences. I think the A24 is the development related licence. Obviously things like livestock, that wouldn't apply. So that's really confusing.”P3

Select a reason for exemption

- Users considered the previous page to be redundant
 - *“You could almost skip the page before and then come straight to this one”* P1
 - *“You don’t really need two pages, you just need one”* P4
- Selecting an option was difficult because:
 - Options not A24 licence specific
 - Multiple options could apply (bullets 2, 4, 7)
- Expectation to ‘justify’ selection
 - *“I think you should have to justify it a bit more. It’s asking me the question and I’ve just selected an option, but it’s not asking me for any other information to say why”* P3

The image displays two screenshots of a GOV.UK form titled "Apply for a licence to do work that affects a protected species".

The top screenshot shows the "Exemptions from paying for a wildlife licence" section. It lists reasons for exemption: preserve public health and safety, prevent damage to livestock, crops, timber or property, prevent disease spreading, be home improvement through householder planning permission or permitted development, be for scientific, research or educational purposes, be for conservation of protected species, including protection of bat roosts, and be to conserve scheduled monuments, listed buildings, places of worship, or traditional farm buildings. It then asks "Do you think the purpose of your project is exempt from payment?" with radio buttons for "Yes" and "No".

The bottom screenshot shows the "Why do you think your project is exempt from payment?" section. It asks the user to "Select one option." and provides a list of radio buttons corresponding to the exemption reasons: Preserving public health and safety, Preventing damage to livestock, crops, timber or property, Preventing disease spreading, Home improvement through householder planning permission or permitted development, Scientific, research or educational purposes, Conservation of protected species, including protection of bat roosts, and Conserve scheduled monuments, listed buildings, places of worship, or traditional farm buildings. There is also an "Other" option. A "Continue" button is at the bottom.

What kind of development is happening at the site?

- Selecting an option was challenging due to certain factors:
 - Some options too broad and ‘undefined’ (Commercial, Industrial or Manufacturing)
 - *“Industrial and Manufacturing - that's quite a wide term, what does that mean? Does that mean the construction of a new factory?” P2*
 - Some options too specific (barn conversion)
- Users indicated they would make an educated guess or seek assistance by calling someone
 - *“I would just stop and I would phone Natural England and say I can't progress with this form...there's no point ticking something that is incorrect because you then embed incorrect information further into the form” P4*
 - *“If I'm honest, I'd just take a best guess” P3*

Cost of this licence

- The cost page was unexpected and caused users to question whether they were applying for the right licence. Some said they would abandon the task altogether at this point.
 - *"At this point I would be unsure about whether to continue or not because it would feel like I was just about to be charged for something that I was told wouldn't be chargeable...it might stop me from clicking continue"* P2
 - *"If I thought we were going down the free licencing road, I would be worried about seeing this, especially seeing the continue button...I'll be worried about...am I going to have to pay for this now?"* P1
 - *"It makes me question things...have I got the right licence?"* P3
- The range for the cost of the licence (£300 to £800) considered to be unhelpful.
 - *"It's not always good enough for me to simply signpost them and say, well, you'll get some kind of charge for this. I don't know what it is. I need to help them manage that process and manage their budget and manage their understanding of it. So working with ranges is not overly helpful."* P2
 - *"It says the cost of this licence typically ranges from £300 to £800. That's confusing. If you're going to have different costs for the same licence but for different things, I think that needs to be made very clear."* P3

[< Back](#)

[Save and return later](#)

Cost of this licence

The cost of this licence typically ranges from £300 to £800.

More complex licences cost more. Things that can increase the cost of a licence include:

- if the development affects a protected site
- if badgers are present
- greater impact on badgers, such as disconnecting territories, affecting more setts, and proposals to close setts
- new or more complex methods being used
- incomplete, inaccurate or unnecessary information in the application
- poor quality surveys
- issues with ecologist experience
- phased or multi-plot developments
- planning permission is not fully in place

The cost will be more if you need to make a change in your application once you have submitted it.

Cost of this licence

- Some items in the list perceived to be odd or irrelevant
 - *“If badgers aren’t present, then there’s no need for a licence. So that would be a funny thing that would increase the cost of a licence” P2*
 - *“That’s a silly option [if badgers are present]. If there’s no badgers, there’s no licence...None of these are really relevant if I’m honest, because they don’t reflect this licence” P4*

Which planning authority granted planning permission?

- A lack of visibility of remaining questions makes it difficult for users to know what information to enter. Some suggested they would include the permission number and date granted.
 - *“The problem with this is that there’s no way to see what will be asked further along” P4*
- Users indicated that the planning permission paperwork is the source of this information.

The screenshot shows a GOV.UK prototype interface. At the top, the GOV.UK logo is on the left, and the title 'Apply for a licence to do work that affects a protected species' is on the right, with a 'Sign out' link. Below the title bar, a 'PROTOTYPE' label indicates this is a new service. The main heading of the form is 'Which planning authority granted the planning permission for this development?'. Below this heading is a text input field. A green 'Continue' button is positioned below the input field. At the bottom of the page, there is a footer containing the text 'GOV.UK Prototype Kit v11.0.0', 'Clear data', the Open Government Licence logo and text, and the Crown copyright logo.

What type of planning permission was granted?

- ‘Hybrid’ was unclear
 - *“What’s Hybrid planning permission?” P3*
- Expectation that more than one permission type can be selected [rather than adding one at a time]
 - *“Might be useful to be able to select more than one thing” P2*
 - *“It doesn’t allow you to select Full and Outline” P3*

The screenshot shows a GOV.UK prototype form for applying for a licence to do work that affects a protected species. The form is titled 'What type of planning permission was granted?' and includes a subtext: 'Check your planning permission documents if you are unsure what permission type you have.' There are four radio button options: 'Full', 'Outline', 'Hybrid', and 'Other'. A green 'Continue' button is located below the options. The form is marked as a 'PROTOTYPE' and includes a 'Save and return later' link. The footer contains the GOV.UK Prototype Kit v11.0.0, OGL license information, and the Crown copyright logo.

Flow of the planning permission pages

- The sequence in which the questions were presented perceived as disconnected and lacking a logical order.
- Expectation is for planning permission and planning permission type to be shown together.

Add another permission

- Add another permission option noticed and understood
- Users knew why multiple permissions would be necessary, as had dealt with these in the past (mineral, planning and outline).
- Some users found entering multiple permissions one at a time to be a 'clunky' experience.
- Users requested the ability to enter more information for each permission
 - *"I want to put a bit of extra stuff in there. Things like the scale, the type of development, the description like x houses. It's very useful to have that information" P4*
 - *"It's sensible to say what the application is for...Full permission for the development of 200 houses. Then the next one would be outline permission for road access and drainage" P2*

Describe the potential conflicts between this application and other legal commitments

- Users understood this page to be asking about conflicts between the work they were planning and what has been agreed in the Section 106 agreement, Environmental Statement, Public Inquiry.
- However, they questioned why they would be applying for a licence if there were conflicts with any legal commitments.
 - *“it doesn’t make sense...if there was a conflict, why would you be doing this?”* P4
- The hint text makes reference to uploading documents that show permission has been granted which does not match what is being asked on this page (potential conflicts)
 - *“I don’t understand why that sentence is relevant at all to this question. They look like they should be completely independent of each other”* P3

The screenshot shows a GOV.UK prototype interface. At the top, the GOV.UK logo is on the left, and the title 'Apply for a licence to do work that affects a protected species' is on the right, with a 'Sign out' link. Below the title bar, a blue 'PROTOTYPE' banner states 'This is a new service – your feedback will help us to improve it.' Navigation links include '< Back' and 'Save and return later'. The main heading is 'Describe the potential conflicts between this application and other legal commitments'. Below this, a hint text reads 'You will be able to upload documents showing permission granted.' followed by a large empty text box. A green 'Continue' button is at the bottom of the form area. The footer contains 'GOV.UK Prototype Kit v11.0.0', 'Clear data', the OGL logo with the text 'All content is available under the Open Government Licence v3.0, except where otherwise stated', and the Royal Coat of Arms with '© Crown copyright'.

Conservation Considerations

Scenario: *Imagine that you are working for a developer on a development that involves conversion of a former mill to flats. A licence to close a badger sett on the development site is required. The set extends into a neighbouring SSSI woodland known as Tudeley Woods SSSI. The site is also within the Weald AONB. Please use the prototype to show us how you would complete the application for this scenario.*

The screenshot shows a web form titled "Apply for a licence to do work that affects a protected species" on the GOV.UK website. The page is marked as a "PROTOTYPE" and includes a "Sign out" link. A "Back" link is visible on the left, and a "Save and return later" link is on the right. The main heading is "Designated sites". Below this, a message states: "You must tell us if the proposed activities you need the licence for could affect any of these designated sites:". A bulleted list follows, containing: "Site of Special Scientific Interest (SSSI)", "Special Protection Area (SPA)", "Special Area of Conservation (SAC)", and "Ramsar Site". A link "Check the location of designated sites (opens in new tab)" is provided. The next section is "Will the activity take place on or next to any designated sites?", with radio buttons for "Yes" (selected) and "No". A "Continue" button is at the bottom of this section. The footer includes "GOV.UK Prototype Kit v11.0.0" and "Clear data", along with the Royal Coat of Arms.

Tell us about each designated site

- Unclear if ‘activity’ is referring to the activity undertaken by the ecologist (closure of a badger sett) or the development activity.
- *“I would be thinking about the activity that I would be undertaking which would be the closure of the badger sett but it could refer to the wider scheme” P2*

The screenshot shows a GOV.UK prototype interface. At the top, there is a black header with the GOV.UK logo, the title 'Apply for a licence to do work that affects a protected species', and a 'Sign out' link. Below the header, a blue bar indicates 'PROTOTYPE' status with a note: 'This is a new service – your feedback will help us to improve it.' Navigation links include '< Back' and 'Save and return later'. The main heading is 'Tell us about each designated site the activity will affect'. Below this, a subtext says 'You can add more than one designated site.' and a green button reads 'Tell us about the first designated site'. The footer contains the text 'GOV.UK Prototype Kit v11.0.0', 'Clear data', the OGL logo, 'All content is available under the Open Government Licence v3.0, except where otherwise stated', the Royal Coat of Arms, and '© Crown copyright'.

What is the name of the designated site?

- Users expected to enter the site name plus designation e.g. 'Tudeley Woods SSSI'
- One user (with dyslexia) requested to be able to see the list of designated sites previously entered on this page to avoid accidentally adding the same site twice
 - *"So you can see the ones you have done and the one you are working on. Sometimes there might be 10 sites and they are all named the same. I'm dyslexic and sometimes if you are reading off a list, you might accidentally put the same thing in or muddle it up so it's good to have it there to check so you have a reference"* P4
- There was an expectation to have a free text entry field, in the event they could not find the site in the auto-suggest list.
 - *"I would expect there to be an ability to enter free text. If there wasn't, then you'd be stuck in the process at that point, and that's when you'd be phoning up the Licencing helpline or whoever"* P2

The screenshot shows a GOV.UK prototype interface. At the top, there's a black header with the GOV.UK logo, the title 'Apply for a licence to do work that affects a protected species', and a 'Sign out' link. Below the header, a blue bar indicates 'PROTOTYPE' and provides feedback information. The main content area has a '< Back' link and a 'Save and return later' link. The primary question is 'What is the name of the designated site?', followed by a text input field and a green 'Continue' button. The footer contains version information (GOV.UK Prototype Kit v11.0.0), a 'Clear data' link, the OGL logo, a copyright notice, and the Royal Coat of Arms.

Permission from the owner/occupier of the site

- Confusion on whether this is referring to permission from Natural England or permission from the landowner.
 - *“I would click yes if I had permission to go on the site or from Natural England” P5*

Flow of the landowner and NE permission pages

- Users were unsure of what information to provide at certain points in the form because they could not see what questions would be asked later on.

Give details of the permission

- The language used was considered vague
 - *“Give details of the **landowner** permission. To avoid confusion with planning consent which has already been dealt with” P2*

The screenshot shows a GOV.UK prototype interface for applying for a licence to do work that affects a protected species. The page is titled 'Give details of the permission' and includes a sub-header 'For example, dates and names. You will be able to upload documents showing permission granted.' Below this is a large empty rectangular box for input. A 'Continue' button is located below the box. The footer contains the text 'GOV.UK Prototype Kit v11.0.0 Clear data', the OGL logo, and the text 'All content is available under the Open Government Licence v3.0, except where otherwise stated'. The Royal Coat of Arms and '© Crown copyright' are also visible.

Will the activity happen on the site or next to the site?

- Vague language confused users on what site was being referred to (development or designated)
 - *“when it says ‘on the site’ you have to assume it means on the protected site. It doesn’t make it clear” P5*
